

COMPANY PROFILE: STEADYMED THERAPEUTICS

SteadyMed Therapeutics, Inc, is a specialty pharmaceutical company. SteadyMed leverages its PatchPump® platform to develop its own therapeutic portfolio and partners to optimise the delivery of high volume (greater than 2 mL), high-value, small-molecule or biologic drugs.

Our family of PatchPumps can be customised to deliver liquid drugs, including biologics, with a wide range of volumes and viscosities, in a consistent and controllable manner.

OUR VISION

SteadyMed aspires to redefine the parenteral therapeutics experience for patients dependent upon large doses of intravenous and subcutaneous medications: extending the limits of parenteral therapeutics to restore freedom, joy and dignity to patients' lives.

BREAKTHROUGH TECHNOLOGY

Through its proprietary ECell technology and primary container, the PatchPump® is the only customisable, prefilled, and pre-programmed disposable parenteral delivery platform for large volume and viscous formulations. PatchPump® is the most size-efficient and scalable delivery product for injectable drugs because: one single ECell design acts as both the power source and the driving mechanism for the whole range of drug volumes and viscosities; the volume of the drug container is easily changed without fundamental changes to the technology.

THE "HEART" OF PATCHPUMP®

The ECell® is the compact and self-powered driving mechanism that is used to activate and operate the PatchPump® while maintaining size efficiency, and patient comfort.

Figure 1: PatchPumps in (left) external cannula and (right) integrated cannula formats.

The ECell:

- is a unique, small, self-powered expanding battery
- irreversibly expands upon discharge
- is fully disposable
- is electronically controlled enabling accurate and specific drug dosing
- expands under high pressures enabling delivery of viscous drugs
- is IP protected and fully owned by SteadyMed Therapeutics.

PRODUCT ADVANTAGES

A Few Ways PatchPump® Works for You

Our PatchPumps are being developed to deliver liquid drugs, including biologics, in a controlled manner via a compact and simple to use design.

SIMPLE – Prefilled with drug, no complex mechanics and easy to manufacture. Just apply to the body and go!

Figure 2: The ECell proprietary expanding battery is at the heart of the PatchPump®.

SMART – Precise electronic control allows accurate delivery of pre-programmed dose, while providing feedback to patient.

SMALL – Slim profile design, comfortable and discreet.

PRECISE – Sensor based control for accurate basal or bolus delivery of drug.

SCALABLE – The PatchPump® platform can accurately deliver a range of drug dose volumes from 1 mL to volumes over 2 mL, independent of viscosity.

SELF MONITORING - Internal sensors provide patient with dosing feedback.

(PRE) FILLED WITH CONFIDENCE

 **PatchPump** by SteadyMed Therapeutics, Inc.

SteadyMed is about to expand the delivery limits of parenteral therapeutics with PatchPump® the world's leading pre-filled and pre-programmed liquid drug delivery platform that's not only customizable but discreet.

Learn how to get pre-filled with the confidence that will transform how parenteral therapies are delivered.
